

NORTHLANE SOFTWARE INC.

SECURITY INCIDENT POSTMORTEM — MARCH 2026 STAGING CREDENTIAL EXPOSURE

Document ID	ADM-A3-2026
Incident Date	March 14, 2026
Incident Commander	Sam Okafor, Director of Security
Executive Review	Priya Nathan (VP Eng), Jordan Reyes (General Counsel)
Classification	Strictly Confidential / Security Postmortem

1.0 INCIDENT OVERVIEW & TIMELINE

1.1. On March 14, 2026 at 04:12 UTC, automated secret scanning detected an unencrypted AWS staging API token committed to a private GitHub repository during pipeline testing for Northlane Insights under engineering teams led by Priya Nathan.

2.0 ROOT CAUSE ANALYSIS & CONTAINMENT

2.1. Immediate Containment. Sam Okafor (Director of Security) executed immediate token revocation within 18 minutes of detection. Audit logs confirmed zero unauthorized data exfiltration or production system compromise.
