

NORTHLANE SOFTWARE INC.

REMOTE WORK & HYBRID WORKPLACE POLICY

Document ID	POL-E3-2026
Effective Date	February 1, 2026
Document Owner	Dana Whitcombe, Head of HR
Approved By	Marcus Feld (CFO), Priya Nathan (VP of Engineering)
Classification	Internal / Policy Document

1.0 PURPOSE AND SCOPE

1.1. Northlane Software Inc. ("Northlane" or the "Company") recognizes that distributed work arrangements enhance operational efficiency, talent acquisition, and workforce retention. This Remote Work & Hybrid Workplace Policy establishes the operational standards, scheduling requirements, eligibility criteria, and security obligations governing employees who perform job duties fully remotely or under a hybrid schedule.

1.2. This policy applies to all full-time and part-time personnel employed across all geographic regions. Adherence to these provisions is mandatory for maintaining a remote or hybrid working arrangement.

2.0 WORKPLACE CLASSIFICATIONS & SCHEDULING REQUIREMENTS

2.1. Hybrid Workplace Alignment. Employees assigned to the corporate headquarters in Austin, Texas, are designated under a hybrid arrangement. Hybrid personnel are required to work on-site at the Austin office a minimum of two (2) designated business days per calendar week, as determined by departmental leadership, to facilitate cross-functional alignment and team collaboration.

2.2. Remote-First Engineering & Operational Teams. Distributed personnel, including the engineering organization overseen by Priya Nathan, VP of Engineering, operate primarily under a remote-first classification. Remote personnel perform daily responsibilities from an approved home office location.

2.3. Core Collaboration Hours. To ensure operational continuity across multiple time zones, all remote and hybrid personnel must maintain routine availability on corporate communication platforms (Slack, Google Workspace) during mandatory central core collaboration hours from 10:00 AM to 3:00 PM Central Time (CT), Monday through Friday.

3.0 WORKSPACE ENVIRONMENT & FINANCIAL STIPEND

3.1. Ergonomic and Operational Standards. Employees operating under remote status are responsible for maintaining a dedicated, quiet, and ergonomically suitable home workspace free from non-work-related distractions and security vulnerabilities.

3.2. Home Office Equipment Stipend. Regular full-time remote employees are eligible for a one-time home office setup stipend of up to \$500.00 USD, administered in accordance with expense policy reimbursement guidelines overseen by Marcus Feld, CFO. Eligible expenses include ergonomic seating, secondary monitors, external keyboards, and workspace peripherals. In addition, a recurring monthly connectivity stipend of \$75.00 USD is provided to offset home high-speed internet costs.

4.0 DATA PRIVACY & INFORMATION SECURITY OBLIGATIONS

4.1. Network Security Protocols. Remote personnel must conduct all business communications and system operations using company-provisioned hardware equipped with corporate endpoint protection. Connecting to production environments, internal source code repositories, or customer data pipelines powering Northlane Insights from unencrypted public Wi-Fi networks is strictly prohibited unless routed through the authorized corporate VPN.

4.2. Physical Security Standards. Remote employees must ensure that confidential printed materials, sensitive customer records, and physical equipment are protected against unauthorized access by third parties or household members. Screen lock timeouts (maximum 5 minutes) must remain enabled on all computing assets under protocols specified by Sam Okafor, Director of Security.

5.0 POLICY ADHERENCE & ADMINISTRATION

5.1. Performance and Review. Remote work is an operational arrangement, not an employee right. Continued eligibility is contingent upon satisfactory job performance, compliance with communication guidelines, and supervisor approval. Northlane reserves the right to modify or revoke remote work privileges upon thirty (30) days written notice issued by Dana Whitcombe, Head of HR.
