1.0 PURPOSE & APPLICABILITY

1.1. This Standard Operating Procedure (SOP) defines mandatory administrative, legal, and IT security protocols governing voluntary and involuntary employment separations at Northlane Software Inc. ('Northlane'). The goal is to ensure smooth operational transitions, protect corporate intellectual property, and guarantee statutory compliance.

1.2. This procedure applies to all full-time, part-time, and contracted workforce members across all operating locations.

2.0 SYSTEM ACCESS REVOCATION & IT SECURITY PROTOCOLS

2.1. Involuntary Terminations. Upon formal notice of involuntary termination, Sam Okafor (Director of Security) or designated IT administrative staff shall immediately revoke all Okta Single Sign-On (SSO) credentials, AWS production access privileges, GitHub repository permissions, Google Workspace access, and VPN tunnels simultaneously with the HR separation notification meeting.

2.2. Voluntary Resignations. For voluntary separations, access credentials shall remain active until 5:00 PM Central Time on the employee's final designated working day, unless security risks dictate expedited credential revocation.

3.0 HARDWARE RECOVERY & FINAL COMPENSATION

3.1. Hardware Asset Recovery. Departing personnel must return all company-owned equipment (MacBook workstations, monitors, security tokens, access badges) within five (5) business days of separation. Prepaid return shipping containers are provisioned by IT Operations.

3.2. Final Paycheck & Severance Disbursement. Final salary payments, accrued PTO payouts (where required by state law), and severance disbursements authorized by Marcus Feld (CFO) and reviewed by Jordan Reyes (General Counsel) shall be processed on the next standard bi-weekly payroll cycle.
